Subject: [EXTERNAL] : FW: PFC Working Group

Hi Lori/June/Roger

Glad to see everyone last week and hope travels were non-eventful

This is to let you know that the Acting RA (EPA R1) put forth a plan to convene a NE EPA/State PFAs workgroup. Monthly calls are anticipated.

The notice went to environmental agencies. MA DEP (Doug Fine) , NH DES (Brandon Kernan) and VT DEC have already identified state points of contacts for this working group. This is to see if DW programs in the health agencies are interested in joining . So Lori. June and Roger – let me know if you are interested.

I know this is short notice but the first working group call is this afternoon – will forward logistics to those who expressed interest.

Call if questions

Jane

The first relates to perfluorinated compounds (PFCs). Given the ever evolving issues with PFCs across the northeast, I would like to create an EPA/State working group to share information and coordinate resource requests. If your state is interested in participating, please send me your designated point of contact (POC). I am going to have Meghan Cassidy, my Superfund Technical Support Section Chief, chair the group and we will have other technical experts sitting in as well.
